

Why use a headset?

Free your hands. The most obvious benefit of a headset is that it frees you from holding the telephone handset. And lets you put both hands to work, comfortably.

Get more done. A headset makes you more productive, letting you write, type, page through files, etc. with both hands while you're on the phone.

Save your neck. You'll be more comfortable with a headset—no more propping the telephone between your head and shoulder.

Why choose the GN 4140?

How do you know which headset is right for you? The GN 4140 may be just what you're looking for, if these features feel like a good fit:

Corded headset system. If you usually work at your desk, or close to it, a corded headset should work for you.

Behind-the-ear style. The GN 4140 has a unique, contoured style that fits inconspicuously behind your ear.

Sound in one ear (monaural). Ideal if you like to be aware of what's going on around you during phone calls.

Noise-filtering microphone. The right choice if you work in an environment where there's occasional noise.

GN 4140

Thinking about using a headset?

Start here.

If you spend a lot of time on the phone, but haven't made the move to a headset, the GN 4140 is the perfect place to start. It's small and unobtrusive. Easy to set up and use. And easy to afford, too—while still affording you all the convenience, comfort and productivity you need.

Good things in small packages.

The GN 4140's JABRA headset is less than 4 inches long, and weighs only half an ounce. So it's big on comfort. Just slip it behind either ear, and the GN 4140 stays put. Its MiniGel™ channels sound directly into your ear. And the sturdy, stay-in-place microphone boom is perfectly positioned to pick up your voice—but not unwanted room noise.

The GN 4140 amplifier is packed with features, too. It boosts the strength and quality of the voice signal. Gives you control over volume and tone. And lets you switch easily between the headset and your telephone's handset. But it doesn't take up a lot of desk space—and because it's battery-powered, it doesn't clutter up your workspace with a lot of wires, either.

Easy does it.

The GN 4140 is all about simplicity. So even if you've never used a headset before, you'll be up and running in no time. It works with just about any corded telephone. You just make a couple of basic connections, and you're in business.

The GN 4140 has it all. Good looks. Great sound. And great value. So it's the perfect way to enter the world of hands-free convenience. The world of GN Netcom.
